

HOSE CLAMPS

WORM GEAR HOSE CLAMP

Our Worm-drive clamps offer easy adjustment over a wide diameter range and provide a high, uniform clamping force for a positive, 360° seal. 100% Mechanical interlock for greater strength and protection from corrosion. Our clamps are available with steel zinc plated slotted 5/16" hex screws, or 305

Stainless Steel Screw, and 410 Stainless Steel Screw, while the band and housing are 300 series Stainless Steel, band thickness is .023". For your maintenance needs in small 10 ct packs or bulk discounts are available for higher volume production requirements.
